

About KidTrax®

KidTrax is a comprehensive web-based youth and membership tracking system that combines ID cards, scanning technology, a middleware connection to school district databases, reporting, and a variety of other tools to assist in tracking, managing and analyzing participation in youth programs. The system automatically logs time and attendance information by scanning special ID cards when members enter and leave a facility, eliminating paper sign-in sheets and manual compilation. Reports identify key usage patterns to aid in program development and documentation for funding requests.

What PALs are saying about KidTrax® Web

Sergeant Bob McManus Charlotte-Mecklenburg Police Department Police Athletic League

"I like the flexibility of the web-based system. The online registration allows us to collect required data that adds to our credibility. Our funders have been dazzled; they feel good donating their dollars to us because we can show them our need and provide end results. They feel like their donation makes a direct impact and that is definitely something to get excited about."
